

REMARKS

This Amendment is submitted supplementary to the previous Amendment and in connection with the interview with the Examiner.

With the present Amendment some claims have been amended to more clearly define tangible results from the method and device of the present invention in the sense of 35 U.S.C. 101.

In view of the Examiner's question related to a value and a phase of a complex resistance as to its support in the specification, it is respectfully submitted that the support for this feature can be found for example in the paragraph bridging pages 3 and 4, in third full paragraph on page 4, in first full paragraph on page 5, in second paragraph of page 9 of the specification, etc.

It is believed that the claims in the present application should be considered as satisfying the requirements under 35 U.S.C. 101 and 35 U.S.C. 112 and as clearly and patentably distinguishing the present invention from the prior art applied by the Examiner.

Reconsideration and allowance of the present application is most respectfully requested.

Should the Examiner require or consider it advisable that the specification, claims and/or drawings be further amended or corrected in formal respects in order to place this case in condition for final allowance, then it is respectfully requested that such amendments or corrections be carried out by Examiner's Amendment, and the case be passed to issue. Alternatively, should the Examiner feel that a personal discussion might be helpful in advancing this case to allowance, he is invited to telephone the undersigned (at 631-549-4700).

Respectfully submitted,
/ Michael J. Striker /
